Project Requirements

Building the Data Ware house (Data Engineering)

Objective

Develop a modern data warehouse using SQL Server to consolidate sales data, enabling analytical reporting and informed decision-making.

Specifications

- **Data Sources:** Import Data from two source systems (ERP and CRM) provided as CSV Files.
- **Data Quality:** Cleanse and resolve data quality issues prior to analysis.
- **Integration:** Combine both sources into a single, user-friendly data model designed for analytical queries.
- **Scope:** Focus on the latest datasets only; Historization of data is not required.
- **Documentation:** Provide clear documentation of the data model to support both business stakeholders and analytic teams

BI: Analytics & Reporting (Data Analysis)

Objective

Develop SQL-based analytics to deliver detailed insights into:

- **Customer Behavior**
- **Product Performance**
- Sales Trends

These insights empowers stakeholders with key business metrics, enabling strategic decision-making.
